## PROJECTS

### • Legal Case Analysis Chatbot

- Developed a chatbot for e-Zest to process and analyze legal documents, leveraging Hugging Face's BERT for NLP and Neo4j for knowledge graph visualization.
- Leveraged Hugging Face's BERT for NLP tasks, implementing document summarization and query handling to extract insights from complex legal texts.
- Integrated Neo4j for knowledge graph visualization, enhancing the chatbot's ability to represent relationships within legal data..
- Resolved API key and Neo4j authentication issues, ensuring robust performance and seamless deployment of the chatbot.
- Technologies Used: Python, Flask, Hugging Face (BERT), Neo4j, NLTK, Git/GitHub

### • LEGAL COMPLIANCE

- Developed a web-based application to compare and analyze legal contracts for discrepancies and compliance with legal standards.
- Designed an interactive and user-friendly interface for uploading, comparing, and reviewing contract documents.
- Collaborated within a team to ensure timely project delivery, seamless integration, and successful deployment.
- Technologies Used: Python, Flask, JavaScript, HTML, CSS, and OCR.
